

## ACKNOWLEDGMENTS

Leg 170 benefited greatly from the tireless support of the captain, crew, and technicians aboard the *JOIDES Resolution*. We are particularly grateful to Mike Storms, the operations manager, for his innovative expertise, which was always delivered with good humor and a sense of helpfulness. We would not have succeeded to the degree that we did without his contributions. The technical staff of the *Resolution* was outstanding in all respects. Their competence, dedication, good humor, and genuine concern for the high degree of excellence of every aspect of the expedition played a central role in its success. We required several additions to the drilling schedule during the leg because of logistical difficulties, and we are grateful to the help and encouragement of Tim Francis for his availability at any time, which enabled us to succeed in these changes. Finally, the hard work and high competence of the ODP Publications Services staff have been instrumental in the publication of this volume.
