Comprehensive Ocean Drilling Bibliography

containing citations related to the

Deep Sea Drilling Project,
Ocean Drilling Program,
Integrated Ocean Drilling Program,
and
International Ocean Discovery Program

Last updated: February 2018
Introduction

The Comprehensive Ocean Drilling Bibliography (Comprehensive Bibliography) includes citations for *Initial Reports of the Deep Sea Drilling Project*, *Proceedings of the Ocean Drilling Program*, *Proceedings of the Integrated Ocean Drilling Program*, and *Proceedings of the International Ocean Discovery Program* volumes; published and “in press” citations derived from reference lists for these volumes; citations for articles published in scientific journals to fulfill Integrated Ocean Drilling Program and International Ocean Discovery Program (IODP) Science Party obligations; additions to Ocean Drilling Program (ODP) leg-related citation lists; and additions to Integrated Ocean Drilling Program and IODP expedition-related bibliographies.

Citations for *Proceedings* volume reference lists are generated by chapter authors, who are responsible for providing complete reference information for every citation from their text and ensuring that all reference information is complete and current at the time of initial submission. The IODP reference editor and bibliography editor are responsible for formatting citations for inclusion in Integrated Ocean Drilling Program and IODP *Proceedings* volumes, ODP leg-related citation lists, Integrated Ocean Drilling Program and IODP expedition-related bibliographies, the International Ocean Discovery Program Bibliography, and the Comprehensive Ocean Drilling Bibliography. As these citations are edited, DOI numbers or URLs and hypertext links are added to any citation for which a DOI or URL is available. The notation [*] or [†] after a citation indicates that the contents of the citation have been confirmed via CrossRef or GeoRef, the American Geosciences Institute (AGI) citation database.

The bibliography editor makes periodic revisions to the Comprehensive Bibliography to add citations, correct errors, add DOI numbers, and update in-press citations that have been published. The online Comprehensive Bibliography PDF file is updated twice annually.

Please inform the bibliography editor if you notice an error in the Comprehensive Bibliography or if there are DSDP/ODP leg-related or Integrated Ocean Drilling Program or IODP expedition-related citations missing from the Comprehensive Bibliography.
A

Note: [*] or [†] after citation indicates that the contents of the citation have been confirmed via CrossRef or GeoRef, the American Geological Institute citation database.
