0 - 35 cm: dark grayish brown, slightly mottled. Rare black streaks of pyrite.

35 - 66 cm: Color contact is gradational. Interval 35 cm from a dark grayish brown (10YR 4/2) above to a gray (5Y 6/1) below. Sediment from 35 - 66 cm is soupy.

66 - 96 cm: Is water.

96 - 150 cm: 96-106 cm is a gray (5Y 5/1). Gradational contact occurs at 106 cm. Below this contact the color is a dark gray (5Y 4/1). Sediment is somewhat soupy and deformed. No visible structures.

These data are to be processed into a computerized data base along with existing standardized data from other legs and will be accessible to the scientific community at large. RECORD ALL MEASUREMENTS CAREFULLY, COMPLETELY, AND LEGIBLY.
