ODP
VISUAL CORE DESCRIPTION

SEDIMENTS / SEDIMENTARY ROCKS

SECTION DESCRIPTION
Large - 7 cm - Silicified Limestone
Laminated

Unlithified foraminiferal packstone

Foraminiferal packstone of Plank (Cherty)
May be a broken layer instead of
ULFT - clasts up to 3 cm.

Partially lithified to unlithified foraminiferal packstone

Debris of broken layers more like debris flow, clasts 0.5 cm

Unlithified packstone

Same as

Lithified foraminiferal packstone

Same as

Lithified foraminiferal packstone

The ULPK is soft
- almost an oozes, but
grains can be distinguished

NO CORE CATCHER
