There are several sections of data on this page, including:

- **Visual Core Description**
  - **Section**: SEDIMENTS/SEDIMENTARY ROCKS
  - **Description**: Entire core moderately to highly fractured, with much matrix and matrix highly contorted and deformed.
  - **Additional Notes**: Biscuit matrix, with many small, thin, and brown crinkles. Some contorted lamination.

- **Smear Slides**: @ 75 cm

- **OCP**: ODP 1044 A 43, E 1044 X 02

- **Graphic Representation**
  - **Samples**: DRILLING DEFORM.
  - **Structures**: COLOR

- **Pie Chart**
  - **Legend**: PIECE #
  - **Data**: GRAPHIC REPRESENTATION

- **Dimensions**: Width: 612.0, Height: 792.0

---

This document appears to contain detailed geological data and observations, likely from a core analysis project. The visual and text descriptions are consistent with the study of sedimentary rocks, focusing on the physical and structural properties of the samples.
