Green (5 4/2) massive claystone, biscuit w/massive drilling scaly fabric.

14-38' interval 14-38' of dark olive-brown (5Y 4/1) laminated & concreted (drilling induced). Laminated fine white gray sand. Sharp base, basal 2m may be X-stratified, but this could be drill disturbance.

- Very scattered (only 2-6 examples detected) <1mm white blades (climacofilit?). 82-140

- 101-104 Thin, diffuse horizon of dark green (5Y 4/1) marl appears to be laminated.
