0-6 graybrown foraminiferoles

6-38 pale gray-brown foraminiferoles

Common planktonic foraminiferoles, some reburied, scattered through section

25-32, steeply dipping (~45°)
diffuse ooze (10YS 3/3)

38-42, slightly more olive

Most of these are not visible except under the reflecting scope. I estimated ~8%, but 38%!

Bedding 25-32 dips 60°
