Oogie

 Zoophycote and other burrows are 1046/2.

 Thin (2mm) burrow from 46-49 cm that's filled with foraminifera! Neat-o.

 Two hollow burrows - drawn filled in. One at 73-77 is filled with foraminifera

 Darker material (1044/2) between 78-75 cm.

 105 cm - what appears to be organic material - possibly a leaf. Very thin <1mm.

 Forams.
