**ODP VISUAL CORE DESCRIPTION**

**SEDIMENTS / SEDIMENTARY ROCKS**

**SECTION DESCRIPTION**

Total length: 154 cm
Slightly - moderately disturbed

Alternating layers of dark [olive gray (5Y 5/2)] and light [light greenish gray (10Y 6/1; 10Y 7/1)] nummulitic chalk.

Dark layers have more terrigenous, silty clay than do light layers. Unfolded throughout. Sharp contact at 83 cm.
