Unit 9: Aphyric massive basalt

Pieces 9 and 10

Contacts: NOT SEEN

Phenocrysts:
- Plagioclase: <0.2%, 0.5-0.8 mm, euhedral tabular-ekman
- Groundmass: Uniformly fine-grained, intersertal
- Color: Light-medium gray
- Vesicles: <0.5%, 0.2-0.5 mm, spherical, filled with chlorite and calcite
- Structure: Fairly massive. Maybe a core of a large pillow or sheet flow

Alteration: Slightly altered

Veins/Fractures: Very scarce. Very thin calcite vein and brown vein are present
